

WHAT IS **SUSTAINABLE** AGRICULTURE?

PROMOTES A WIDE RANGE OF NATURAL PEST CONTROLS, SUCH AS BENEFICIAL INSECTS

Hahn encourages beetles, lady bugs and lace wings to assist in the control of mealy bugs, leaf hoppers and aphids

USES LESS TOXIC PESTICIDES WHEN NATURAL METHODS DON'T WORK

Hahn uses Stylet Oil instead of sulfur when possible which controls mildew and suppresses mites

IMPROVES SOIL BY NATURAL METHODS, SUCH AS COVER CROPS

Hahn uses cover crops including legumes which mulches into nitrogen fixing for the soil

PROTECTS CLEAN DRINKING WATER

Hahn uses VFD (Variable frequency Drive) pumps which controls energy usage and uses UV light treatment to give pure, clean water to the winery

PROVIDES WILDLIFE HABITAT AND ENCOURAGING RESIDENCY

Hahn provides Wildlife Corridors so animals can migrate through the vineyards

CONSIDERS QUALITY OF LIFE ISSUES FOR FARM WORKERS AND NEIGHBORS IN THE COMMUNITY

Hahn provides full benefits to their core group of farm workers, stays involved with the farm growing community

CONTINUALLY IMPROVING FARMING PRACTICES TO MAKE THEM MORE ENVIRONMENTALLY SOUND, SOCIALLY JUST, AND ECONOMICALLY VIABLE.

Hahn promotes the 3E's of sustainability –

Environmentally Sound Economically Viable Socially Equitable

A Path, Not a Destination
